

FLAGSHIP SURGICAL PRODUCT **DESCRIPTIONS** (4 pages)

- **THE SURGICAL MAT™ USA-010 (10mats/case)**
 - The only patented, anti-microbial disposable surgical mat addressing three major Operating Room issues: surgical comfort, fluid buildup and OR safety.
 - Designed and tested by world class surgeons, OR nurses and technicians, The Surgical Mat™ incorporates a revolutionary engineering process consisting of non-slip molded foam with custom tapered fluid channels. These channels aid in keeping the surgical team's feet dry and also reduce the risk of tracking body fluids throughout the surgical suite.
 - The elasticity and cushioning of our mats provide exceptional comfort during prolonged, strenuous surgeries; mitigating foot, leg and back pain which can hamper productivity and focus. OSHA (Occupational Safety & Health Administration) clearly advocates the use of anti-fatigue matting in the workplace to reduce musculoskeletal injury and improve workplace ergonomics. Additionally, the AORN (American Association of PeriOperative Nurses) along with surgical Risk Management teams are strong proponents of what OSHA recommends.
-
- A necessity in every Operating Room.
 - Anti-Microbial
 - Non-slip
 - Latex Free
 - Anti-Static
 - Made in the USA
 - Package Dimensions: 20" L x 39.50" W x 8" H

Ideal for the following surgeries:

- Arthroscopy
- Laparoscopy
- Spine Surgery
- Total Joint Replacement & Revision Procedures
- Trauma Surgery
- Transplant Surgery
- Neurosurgery & Craniotomy

- Urologic Procedures
- Labor and Delivery & C-Sections
- Cardiothoracic Surgery
- Bariatric Surgery
- Plastic Surgery
- Oral Maxillofacial Procedures
- Ear, Nose & Throat Surgery

- **THE MINI MAT™ USA-A10 (10mats/case)**
- The only patented, anti-microbial disposable surgical step stool mat addressing three major Operating Room issues: surgical comfort, fluid buildup and OR safety.
- Designed and tested by world class surgeons, OR nurses and technicians, The Mini Mat™ incorporates a revolutionary engineering process consisting of non-slip molded foam with custom tapered fluid channels. These channels aid in keeping the surgical team's feet dry and also reduce the risk of tracking body fluids throughout the surgical suite.
- The elasticity and cushioning of our mats provide exceptional comfort during prolonged, strenuous surgeries; mitigating foot, leg and back pain which can hamper productivity and focus. OSHA (Occupational Safety & Health Administration) clearly advocates the use of anti-fatigue matting in the workplace to reduce musculoskeletal injury and improve workplace ergonomics. Additionally, the AORN (American Association of PeriOperative Nurses) along with surgical Risk Management teams are strong proponents of what OSHA recommends.

- A necessity in every Operating Room
- Anti-Microbial
- Non-slip
- Latex Free
- Anti-Static
- Made in the USA
- Package Dimensions: 13" L x 17.50" W x 8" H

Ideal for the following surgeries:

- Arthroscopy
- Laparoscopy
- Spine Surgery
- Total Joint Replacement & Revision Procedures
- Trauma Surgery
- Transplant Surgery

- Neurosurgery & Craniotomy
- Urologic Procedures
- Labor and Delivery & C-Sections
- Cardiothoracic Surgery
- Bariatric Surgery
- Plastic Surgery
- Oral Maxillofacial Procedures
- Ear, Nose & Throat Surgery

THE SUCTIONER™ (patent pending) USA-X10 (10mats/case)

The only anti-microbial, disposable surgical suction mat of its kind incorporating continuous powerful suction capability along with our unique anti-fatigue properties!

Quiet, continuous suction. Designed in conjunction with world-class surgeons and nurses, The Suctioner™ incorporates a proprietary, highly-effective vacuum system which is a workhorse at suctioning all fluids coming down from the operative site onto the mat. Utilizing standard OR suction tubing in any length, The Suctioner™ easily attaches to the operating room suction source in seconds. The Suctioner™ has no limits and will ensure a drier, safer and cleaner surgical experience.

Reduced need for laundry on the floor. A significant surgical cost which often goes unnoticed, the use of countless blankets and towels placed on the OR floor to absorb fluids can be reduced or eliminated by using The Suctioner™. This, in turn, makes for a much cleaner and safer work environment and can provide a substantial cost savings to an institution. The anti-microbial properties of The Suctioner™ can also aid in reducing the risk of OR infections and cross-contamination.

Shorter room turnover times. Less mess on the floor equals quicker clean-up times between surgeries. This translates into a greater number of surgical procedures performed in an institution, which boosts revenue. OR personnel are continuously searching for ways to reduce surgical turnover times and increase productivity. The Suctioner™ helps achieve this.

Exceptional comfort. Just like The Surgical Mat™ and The Mini Mat™, The Suctioner™ incorporates our revolutionary anti-fatigue properties which will reduce the strain, stress and discomfort of standing during surgical procedures, increasing productivity and focus. OSHA (Occupational Safety & Health Administration) clearly advocates the use of anti-fatigue matting in the workplace to reduce musculoskeletal injury and improve workplace ergonomics. Additionally, the AORN (American Association of PeriOperative Nurses) along with surgical Risk Management teams are strong proponents of what OSHA recommends.

- Latex Free

- Non-slip
- Anti-Static
- Disposable
- Anti-Microbial
- Made in the USA
- Package Dimensions: 22" L x 35.50" W x 8" H

The Suctioner™ is ideal for a wide array of specialties, including:

- Orthopaedic Sports Medicine Surgery
- Cardiothoracic Surgery
- Trauma Surgery
- Transplant Surgery
- General Surgery
- Urologic Procedures
- Plastic Surgery
- Laparoscopic Surgery
- Cystoscopy
- Labor & Delivery/C-Sections

WHEELED STORAGE UNIT USA-10W (1 each)

Our Wheeled Storage Unit is a solid metal unit which holds 10 Large Mats and 8 Mini Mats. The unit provides a safe and economical way to store all Mat inventory and it has caster wheels which makes it simple for the staff to move around the OR. The Unit also has all product catalog information on it which makes it simple to reorder product. A must-have for any institution using The Surgical Mat™, The Mini Mat™ or The Suctioner™!
