
ORTHO PEDAL LLC

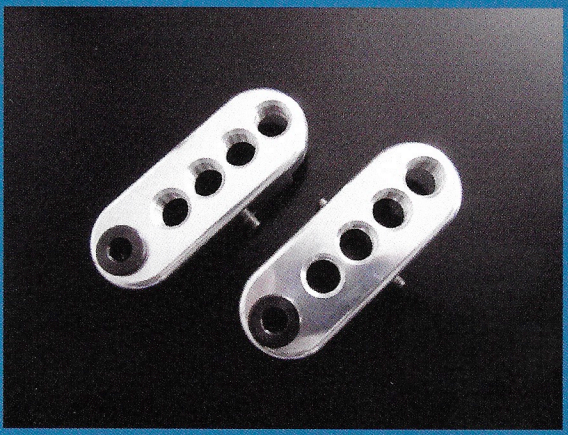
Rebuilding Knees - Restoring Lives

Bring back the joy of bike riding after knee surgery or arthritis with this amazing device!

Ortho Pedal(s) allow people with limited knee (or hip) range of motion get back on the bike!

Why is Cycling so Effective for Knee Rehabilitation?

- Increase or Restore Range of Motion
- Increase or Restore Knee Joint Stability
- Increase or Restore Muscle Strength
- Decrease or Eliminate Pain
- Prevent Reoccurrence of Injury



Narrow Model (fits cranks from 5/8" to 1-1/8")

- Non Weight-bearing
- Low Impact
- Aerobic (cardiovascular) Workout
- Variable Resistance
- Stable Position

How Do Ortho Pedals Improve Cycling Knee Rehabilitation?

Allows Movement of Limited Range of Motion (The closer the pedals are moved to the center of the crank, the less ROM required to pedal.)

- Provides Cardiovascular Exercise
- Controls Range of Motion
- Less Stress on the Knees
- Can Reduce Pain Levels
- Encourages Exercise Activity
- Adjusts as your Knees Improve
- Hip Flexor Muscles Receive the Same Benefits
