

# Lift-Assist Beach Chair

## Make Positioning Easy. Use Lift-Assist One-Handed Positioning.

The Lift-Assist Beach Chair is the latest and most advanced option from Allen Medical Systems for positioning during shoulder procedures. The product offers unobstructed posterior access, and repositioning the patient is quick and easy. The lift-assist design allows for nearly effortless positioning as the pistons support most of the patient's weight.

**Integral Clamps!**

- **Choice in Positioning** - Positioner attaches next to either break of the surgical table seat section
- **Lift-Assist** - Dramatically reduces the effort to lift heavy patients
- **500 lbs. (227 kg) Weight Capacity** - Helps position larger patients
- **Integrated Clamps with Handles** - Makes it easier to set-up
- **Enhanced Width Extension** - 20 $\frac{3}{8}$ " - 24 $\frac{7}{8}$ " (52.4 cm - 63.2 cm). Allows chair to mount on a wide array of tables.
- **Head Rest Design** - Allows greater movement to accommodate shorter patients
- **Unique Table Pad Integration** - Prevents gapping between the pad and chair
- **Sliding Headrest** - Reduces stress on neck when raising and lowering the patient
- **Expanded Surgical Access** - Large cut-out for excellent surgical access
- **Lightweight** - Under 30 lbs. (14 kg) allowing for a single-person setup
- **Articulation Range** - 0° - 90°
